

It's all about legacy...

Our last exhibition of the triumphant Capital of Culture year will end on February 22 with a chorus of whistles, bangs and electronica. Playful, interactive and noisy, DING>>DONG invites you to join in with the party atmosphere here at FACT, as we reflect on the amazing moments from 2008 that have strengthened our position

as the UK's leading organisation for the commissioning and presentation of film, video and new media art forms.

Not only have we welcomed our 2 millionth visitor through the door, achieved our highest visitor numbers ever for a ground-breaking show from the wonderful Pipilotti Rist, but we've literally turned FACT inside out with artwork and projects coming out of the galleries, into our public spaces and on to our pioneering new online arts channel FACT TV. We've toured FACT commissions to Miami and Beijing. Here in Liverpool, we've put birdsong into doctors' waiting rooms, and cameras into the hands of young people and communities across Liverpool.

None of this great work will end in 2009, Liverpool's Year of the Environment. We've responded with a new theme UNsustainable, and we turn the gallery over to you in March for the Climate for Change exhibition, offering audiences a chance to bond over and debate the possibilities for a more sustainable future.

September sees the launch of a new five-day festival for the North West. A massive coup for the city and the region, Abandon Normal Devices (AND) Festival of New Cinema and Digital Culture welcomes you to enjoy, discuss and interact with ideas in a festival that questions 'normal' with an energetic programme of screenings, exhibitions, debate and performances across Liverpool. Drop in and help us create the region's legacy after the enormous success of Liverpool's year as European Capital of Culture!

Mike Stubbs

Director and CEO, FACT (Foundation for Art and Creative Technology)
